

TRAKIT NATIONWIDE

The TRAKIT NATIONWIDE device in the vehicle captures locations and transmits data packets over the nationwide Cellemetry data communications network to IDA's GLOBAL TRAKIT DATA CENTER. The information is accessed either by using a common internet browser program or the TRAKIT NATIONWIDE WEB-CLIENT software.

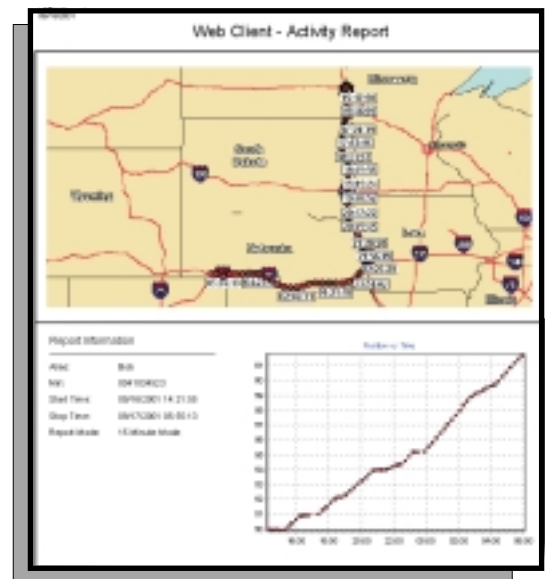

Browser-Access

Get information on any vehicle in your fleet by using a standard internet browser (Netscape, Windows Internet Explorer, etc.) See the vehicle icon positioned on a digital map along with the street address. Do a Query to find out where the vehicle is "right now" without waiting for the next interval report. Download raw history data for manipulation in your own database or spreadsheet utility programs.

Web-Client

Load the TRAKIT NATIONWIDE WEB-CLIENT software on your computer and experience the ultimate in high-performance, low-cost, multiple vehicle, nationwide vehicle tracking. View the last-reported locations of multiple vehicles on the same digital map. Customize your map with landmarks and labels. Maintain your own interactive database with IDA's exclusive Point & Click Database feature. Request locations on vehicles to know where they are "right now". Create and print reports on the locations of your entire fleet. Create and print reports on historical activity of vehicles over any time range.
