

Hide-A-Mic

Hide-A-Mic is a hands-free microphone kit that can be made to "Plug and Play" with most mobile radios with accessory ports.

State of the art technology with adjustable gain gives you the best possible audio available on the market today.

Hide-A-Mic is a cost effective safety tool and is ideal for public and private organizations dedicated to improving safety.

Hide-A-Mic kits come with:

- A foot operated push to talk switch (activated only on command)
- Concealable microphone
- An interface box with standard cables 10 ft long each

Custom kits are available, just call us with your specifications. A few options available include:

- Dual foot switches
- Dual microphones
- Custom cable lengths
- Boom microphones for buses, command vehicles and fire trucks
